

Preparation of Papers for Publication in the AUBE '17 / SUPDET 2017 Proceedings

The electronic file that you supply will be used directly for printing. The final size of the proceedings will be US trade. It is important that the formatting is followed to maintain consistency among all papers. **So the following format settings must be used otherwise a perfect print result is not guaranteed and consequently your paper will not be published in the proceedings!**

Instructions for using the MS Word template

The MS Word template (**AUBE 17 - SUPDET 2017 - Template 6x9.docx**) and an example of a proper formatted paper is available from **the AUBE '17 website** and defines all formatting and styling details. **We strongly recommend to use the template** as it will facilitate very much the manuscript preparation according to the instructions specified below. Add text to the new document by replacing the template text with your manuscript text. The link to the AUBE website is

<http://nts.uni-duisburg-essen.de/aube/aube17/aube17.html>

GENERAL REQUIREMENTS

- Symposium papers have to be in English.
- Abstracts are part of the papers.
- **Papers must be submitted as ".docx"-files, and as pdf-files.**
- Metric system units are to be used for document content.
- Be sure to provide author information per template: FIRSTNAME LASTNAME.
- **Footnotes:** Do not include footnotes.

PAGE LIMITS AND PAGE SETUP

- **Line Spacing** All text must be single spaced.
- **Fonts** ARIAL, **company-specific fonts are not allowed!!**

FONTS / STYLES

Title:	12 point Arial Bold, paragraph spacing 0 point before and 12 point after, left aligned, capitalize first letter of first word, and all principle words
Author Names	10 point Arial, spacing 0 point before and 0 point after, left aligned
Affiliations	10 point Arial Italic, spacing 0 point before and 6 point after, left aligned
Headings	10 point Arial Bold, spacing 6 point before and 6 point after, left aligned
Body Text	10 point Arial, spacing 0 point before and 6 point after, full justification

FIGURES AND TABLES

- All figures and tables must have a number and caption. A single space separates the word Fig. or Table and the number, as well as the figure / table number and caption. Number figures and tables consecutively with Arabic numerals, for example "Fig. 1. Smoke density and CO concentration".
- Figure / Table captions should be concise, more information about them should be given in the text.
- In the text references to figures / tables are numbered consecutively and referred to as Fig. 1, etc.
- Figures and tables are left aligned.
- Pictures are inserted "in line with text." Whenever possible, this option should be applied to pictures to minimize unexpected movement of surrounding text.
- Graphics (including photographs) should have a resolution with at least 600 DPI. Capital letters and figures used in illustrations and graphs have to be at least 10 pt high, thickness of lines 0.2 mm!

REFERENCES

- Indicate references in the text using consecutively numbers in brackets, i.e., [1].
- References are fully justified.

Equations

- Equations are numbered consecutively in the text and referred to as Eq. 1, etc. They must be left aligned.
- Minimum size of characters or numbers is 0.8 mm.
